## Year 6 Maths Key Instant Recall Facts

On this sheet you will find the key instant recall facts for your child's year group. By the end of the year your child must be able to recall these facts instantly. We will work on this in school and would appreciate your support at home.

Know the conversions between fractions, decimals and percentages

$$
\begin{gathered}
\frac{1}{2}=0.5 \\
\frac{1}{4}=0.25 \\
\frac{3}{4}=0.75 \\
\frac{1}{10}=0.1 \\
\frac{1}{5}=0.2 \\
\frac{3}{5}=0.6 \\
\frac{9}{10}=0.9
\end{gathered}
$$

$$
\frac{1}{100}=0.01
$$

$$
\frac{7}{100}=0.07
$$

$$
\frac{21}{100}=0.21
$$

$$
\frac{75}{100}=0.75
$$

$$
\frac{99}{100}=0.99
$$

How many tenths is 0.8 ?
How many hundredths is 0.12 ?
Write 0.75 as a fraction?
Write $1 / 4$ as a decimal?

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: start with tenths before moving on to hundredths. If you would like more ideas, please speak to your child's teacher.

Play games - Make some cards with pairs of equivalent fractions and decimals. Use these to play the memory game or snap. Or make your own dominoes with fractions on one side and decimals on the other.

Know the multiplication and division facts up to $12 \times 12$

 Primary SchoolIdentify prime numbers up to 50

A prime number is a number with no factors other than itself and one.
The following numbers are prime numbers:
$2,3,5,7,11,13,17,19,23$,
$29,31,37,41,43,47$

A composite number is divisible by a number other than 1 or itself.
The following numbers are composite numbers:
$4,6,8,9,10,12,14,15,16,18,20$,
$22,24,25,26,27,28,30,32,34,35,36$,
$38,39,40,42,44,45,46,48,49,50$

It's really important that your child uses mathematical vocabulary accurately. Choose a number between 2 and 50 . How many correct statements can your child make about this number using the vocabulary above?

Make a set of cards for the numbers from 2 to 50 . How quickly can your child sort these into prime and composite numbers? How many even prime numbers can they find? How many odd composite numbers?

Know common factors of a pair of numbers

| $1^{2}=1 \times 1=1$ | $\sqrt{ } 1=1$ |
| ---: | ---: |
| $2^{2}=2 \times 2=4$ | $\sqrt{ } 4=2$ |
| $3^{2}=3 \times 3=9$ | $\sqrt{9}=3$ |
| $4^{2}=4 \times 4=16$ | $\sqrt{ } 16=4$ |
| $5^{2}=5 \times 5=25$ | $\sqrt{25}=5$ |
| $6^{2}=6 \times 6=36$ | $\sqrt{36}=6$ |
| $7^{2}=7 \times 7=49$ | $\sqrt{49}=7$ |
| $8^{2}=8 \times 8=64$ | $\sqrt{64}=8$ |
| $9^{2}=9 \times 9=81$ | $\sqrt{81}=9$ |
| $10^{2}=10 \times 10=100$ | $\sqrt{100}=10$ |
| $1 I^{2}=11 \times 11=121$ | $\sqrt{121}=11$ |
| $12^{2}=12 \times 12=144$ | $\sqrt{ } 144=12$ |

There are many online games to practise finding the greatest common factor, for example:
http://www.fun4thebrain.com/beyondfacts/gcfsketch.html
Choose two numbers. Take it in turns to name factors. Who can find the most?
